SUMMARY

Fullstack Developer with a Computer Science background from Universitas Indonesia (GPA 3.72/4.00), having worked on 7+ real-world projects across various domains, from a face recognition-based academic system and fraud detection platform to an MSME financial management app. Experienced with modern frameworks (Spring Boot, Next.js, AWS) and accustomed to working in environments that demand clean code and scalable architecture.

EDUCATION

Universitas Indonesia, Depok — Computer Science

August 2023 - Present
Bachelor's Degree
GPA : 3.72 / 4.00

EXPERIENCE

Fullstack Developer Intern — PT. Pejuang Indonesia Cerdas

September 2025 - January 2026

- Involved in designing, developing, and maintaining web application functionalities on both frontend and backend sides
- Implemented scalable software architecture, designed efficient RESTful API integrations, and managed databases to ensure optimal and responsive system performance

Teaching Assistant — Introduction to Programming 2

February 2025 - June 2025 & February 2026 - Present

- Guided students in understanding object-oriented programming concepts using Java

PROJECTS

Garuda Cendekia Academy — Fullstack Developer

Tech Stack: Next.js, Spring Boot, PostgreSQL, AWS Rekognition, AWS SDK

February 2026 - Present

- Designed and developed an end-to-end integrated academic information system for a school
- Implemented a face recognition-based attendance system using AWS Rekognition
- Designed database schema and integrated AWS SDK into the backend architecture
- Built payment management and administration modules to digitalize school operational processes

Sokratech — Fullstack Developer

Tech Stack: React Native, React, Flutter, Hono.js, PostgreSQL

February 2026 - Present

<https://www.sokratech.io/>

- Developed a fraud detection platform along with a behavioral tracking SDK
- Implemented touch tracking features and offline queues for effective user data processing
- Built a device fingerprinting module to identify devices, track anomalies, and prevent fraudulent activities

SKILLS

Backend: Python (Django), Go, Spring Boot

Frontend: Next.js, React, HTML5

Database: PostgreSQL, MySQL, Redis, MongoDB

DevOps & Tools: Docker, Git & GitHub, CI/CD, Postman

Software Engineering Practices: SOLID Principles, Clean Coding, RESTful API Design

Security: Authentication & Authorization (JWT, 2FA)

AWARDS

Beasiswa Bakti BCA 2025 Recipient

1st Place — POPDA Chess 2023, Pekalongan Regency Level

3rd Place — National Science Olympiad (OSN) Informatics 2022, Pekalongan Regency Level

LANGUAGES

Indonesian – Native / Bilingual
English – Limited Working Proficiency

ATV 25th FEB UI Website — Fullstack Developer

Tech Stack: Spring Boot, Next.js, Google Sheets API, Cloud Storage

August 2025 - September 2025

<https://www.atv-febui.com>

- Built an event registration system with image upload functionality to cloud storage
- Designed an API that returns file links for easy re-access
- Integrated Google Sheets API for automatic recording and reading of registrant data

Cemal-Cemil Khandara Financial Reports — Fullstack Developer

Tech Stack: Spring Boot, Next.js, PostgreSQL

June 2025 - July 2025

<https://cemal-cemil.vercel.app>

- Developed a financial recording application for an MSME as part of the Beasiswa Bakti BCA 2025 program
- Achieved a client satisfaction score of 3.8/4.0

PerbaikiinAja — Fullstack Developer

Tech Stack: Spring Boot, Next.js, PostgreSQL, Docker, CI/CD

March 2025 - June 2025

- Built a repair service application with three roles: technician, admin, and user, as a final project for the Advanced Programming course
- Applied Clean Code, SOLID Principles, and CI/CD pipeline
- Achieved an A grade in the Advanced Programming course

SIJARTA — Fullstack Developer

Tech Stack: Next.js, PostgreSQL, Docker

October 2024 - December 2024

- Built a data management application as a final project for the Database course
- Wrote all SQL queries manually without any ORM or built-in libraries
- Used Docker to streamline the deployment process

Academeats — Fullstack Developer

Tech Stack: Next.js, PostgreSQL, Docker

March 2024 - June 2024

- Built a food ordering application with authentication, menu management, and order processing features
- Developed a REST API for use in the Flutter-based mobile version
- Achieved an A grade in the Platform-Based Programming course
